DETAILED ACTION

1. This action is in response to the application filed November 24, 2003.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 4-6, drawn to structure of interconnection between two metals, classified in class 257, subclass 758.
 - II. Claims 1-3, drawn to a via/contact photomask, classified in class 430, subclass 270.
 - III. Claims 7-11, drawn to a method of forming interconnection within an integrated circuit, classified in class 438, subclass 510.

Inventions III, II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The product can be made by the following methods: a) instead of using a photomask for patterning the first dielectric layer, the dielectric layer could be selectively deposited thereby eliminating the photomask and the patterning steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2822

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
